- Certified FAA Testing Center
- Dedicated personnel to assist with training plan development
- Instructor Operator Systems (IOS) training for staff not current or experienced in operating simulators

Pilot Training

Companies interested in simulator training can take advantage of the competitive rates offered through dry leasing simulators. Operators can reserve time using their own instructors in the Training Center's full motion simulators or flight training devices.

The training center also offers a "train the trainer" program. Training Center instructors will train a customer's chosen instructor to conduct simulator training and can also provide training materials upon request.

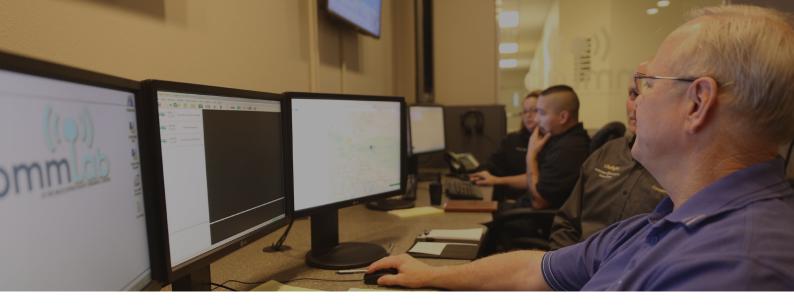

Maintenance Training

The Helicopter Flight Training Center is equipped with a state-of-the-art maintenance classroom for a hands-on approach to engine maintenance and troubleshooting. The Training Center currently offers factory maintenance training from Safran and Pratt & Whitney. Classes are conducted throughout

the year in Shreveport, Louisiana and can accommodate various engine types and training levels.

CommLab

An industry first, partnerships with Flight Vector, Golden Hour, HSI, Xybix and Zoll, enable the CommLab to provide scenario-based training and evaluation for air medical communication specialists. The CommLab is linked to the in-house flight simulators to provide realistic situations.

Training includes inter-facility and scene transfers, bird strikes, neonatal transfers, multiple aircraft requests, misinformation and changing landing zones,

as well as IFR conditions and IIMC. Specialists will hone their skills for map reading, customer service, radio operations, flight planning and following, and safety related procedures.

Courses are held monthly at the Helicopter Flight Training Center, and training addresses the new FAA quidelines.
